

Press Release

First TTCN-3 User Conference in Asia Organized by Testing Technologies and Tekstrom, India

February 26, 2007, Bangalore (India)

The first Asian TTCN-3 Conference attracted not only the existing TTCN-3 community of the booming Indian market. The growing numbers of companies interested in applying this standard to their test environment were strongly represented as well.

Companies like Infineon, Tech Mahindra, Satyam, Siemens and Tata Elxsi, to name only a few, came to hear and discuss various topics around TTCN-3.

Testing Technologies' CEO Mr. Vassiliou-Gioles opened the conference with a detailed introduction to TTCN-3. Later on, RNC Manager David Alvarez from Siemens captivated the crowd's attention by depicting how his team is testing 3G network elements using the development environment TWorkbench. Further speakers from Siemens, Kodiak Networks and Tekstrom Infotech topped off this successful event with revealing presentations.

The TTCN-3 Conference, organised by Tekstrom Infotech (India) and Testing Technologies (Germany), has been the first event in a series of conferences to promote the worldwide testing standard TTCN-3 on the Asian market.

More information on event and presentations you can find at:

What is TTCN-3?

TTCN-3 is a powerful test language for specification and implementation of complex test systems and solutions. Many enterprises worldwide organize their core testing processes around TTCN-3. It guarantees highest flexibility in designing and maintaining test software on a standards level. More Information at <http://www.testingtech.de/ttcn3/quality.php>.

TWorkbench

TWorkbench is Testing Technologies' graphical test development and execution environment providing the full range of features needed for test specification, execution and analysis. Based on the international standardized testing language TTCN-3, TWorkbench supports test automation methods which significantly reduce costs and ensure optimal quality throughout the whole test cycle. As a technology-independent tool, TWorkbench can be deployed for testing products and services in a wide range of different industry sectors.

About Testing Technologies

Testing Technologies designs and markets a huge variety of TTCN-3 based test development tools to specify, implement and run technology-independent test suite platforms.

With a high degree of experience in systematic and automated testing, our team is continuously developing new products together with customer support and training. Our vision is to establish efficient and systematic testing to assure economic and high-quality technology lifecycles.

As a market leader in customer-oriented testing for upcoming standards-based technologies, Testing Technologies is dedicated to TTCN-3 only.

About Tekstrom

Tekstrom is a full service information technology development and consulting company focused on Software Testing and Application Management. We also specialize in delivering superior quality consulting and staffing solutions to clients, thereby enabling them to compete in today's competitive and dynamic business environment.

With an emphasis on excellence in service and by leveraging its experience, Tekstrom is today one of the leading recruiting companies for IT professionals with more than 100 Consultants working at different client sites.
